SCHOOL FURNITURE AND AUDITORIUM SEATING

PIONEERS
IN
SCHOOL FURNITURE

Reliability is the most important part of every Heywood-Wakefield bid

- ★ **132 years of experience in the furniture business . . . the nation's most scientific research, and highly developed skills in the school furniture field.**
- ★ **A dependable source for new school equipment or replacement units.**
- ★ **Highest quality materials and finest production techniques assure immediate satisfaction and long-run economy.**
- ★ **Responsibility which starts with the order, continues through the installation and is always at your service.**

SCIENTIFIC LIBRARY
JAN 20 1958

Only Heywood-Wakefield *TrimLine* offers you this complete selection

★ *Solid wood* desk and table tops, chair seats and backs and tablet arms.

★ *Laminated Plastic* desk and table tops and tablet arms.

★ *HeyWoodite Solid Plastic* desk tops, chair seats and backs and tablet arms. HeyWoodite, an exclusive Heywood-Wakefield development, is a single, homogeneous piece of solid plastic with a smooth, virtually indestructible finish.

Color to liven up the classroom

Heywood-Wakefield TrimLine furniture is available with book boxes and knee panels in five distinctive colors. Each color harmonizes beautifully with either solid wood, laminated plastic or HeyWoodite solid plastic. All units are made with 5/8" x 14 gauge tubular steel frames, lifetime-plated with durable chrome. Strong and light in weight, TrimLine furniture pays for itself in maintenance saved.

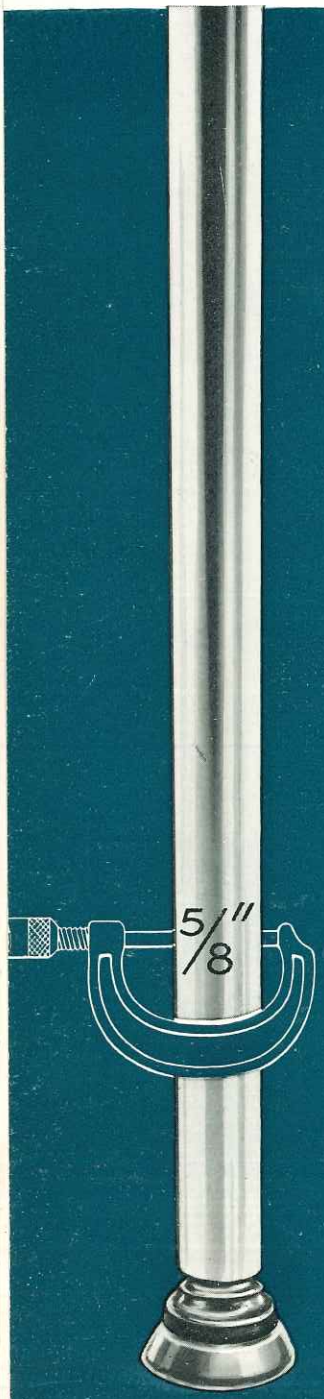
HEYWOOD-WAKEFIELD
EST. 1826

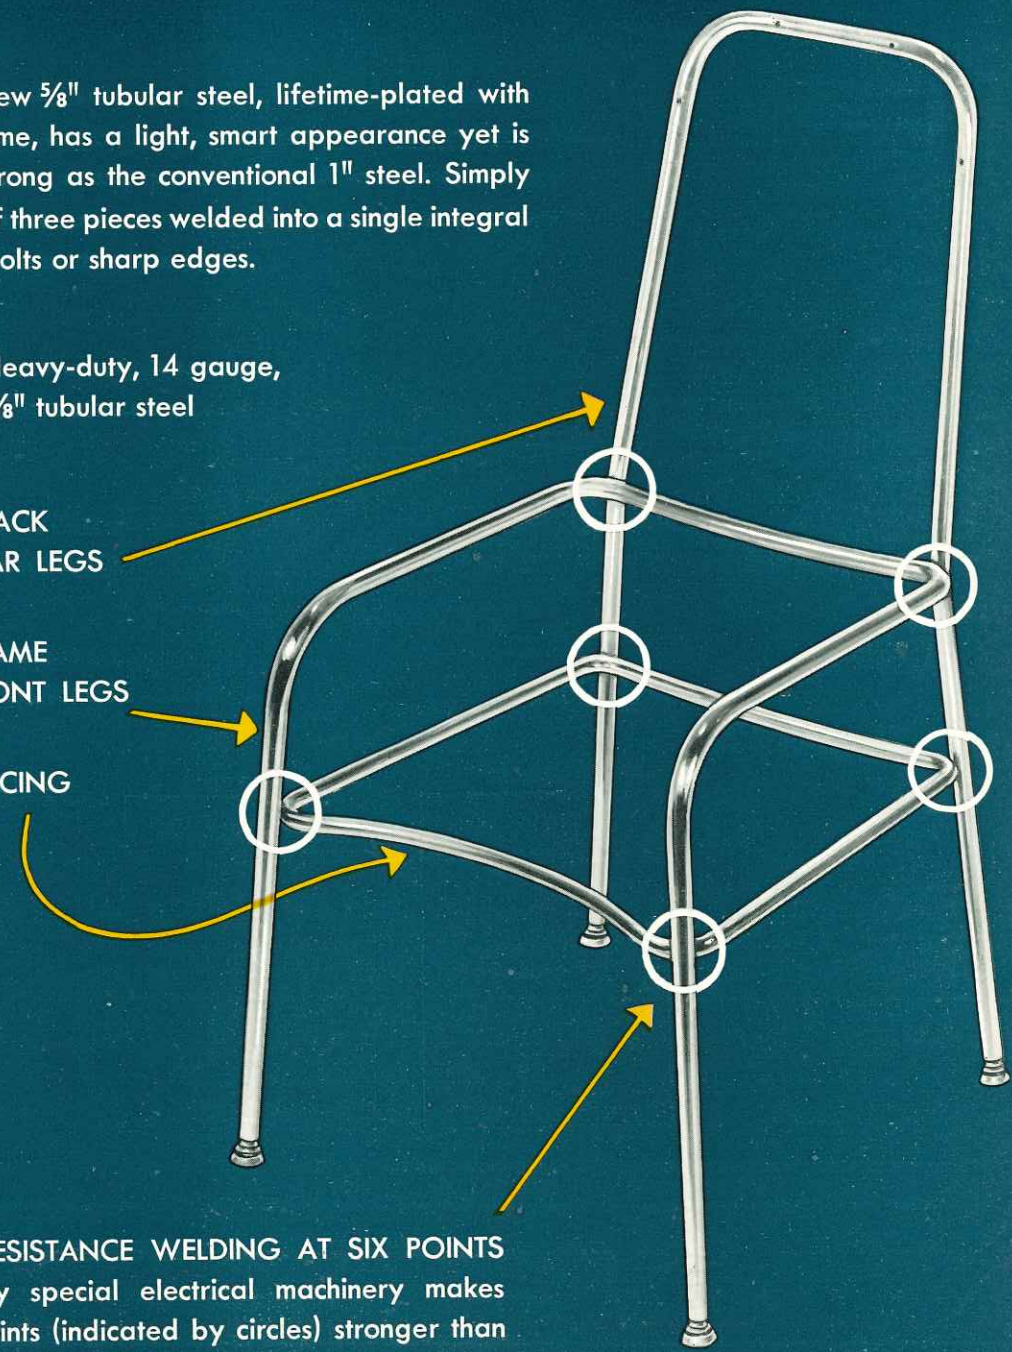
Trim Line

new design simplicity achieves style, comfort and practical convenience with strength to pass the test of time



Heywood's new 5/8" tubular steel, lifetime-plated with durable chrome, has a light, smart appearance yet is equally as strong as the conventional 1" steel. Simply constructed of three pieces welded into a single integral unit without bolts or sharp edges.

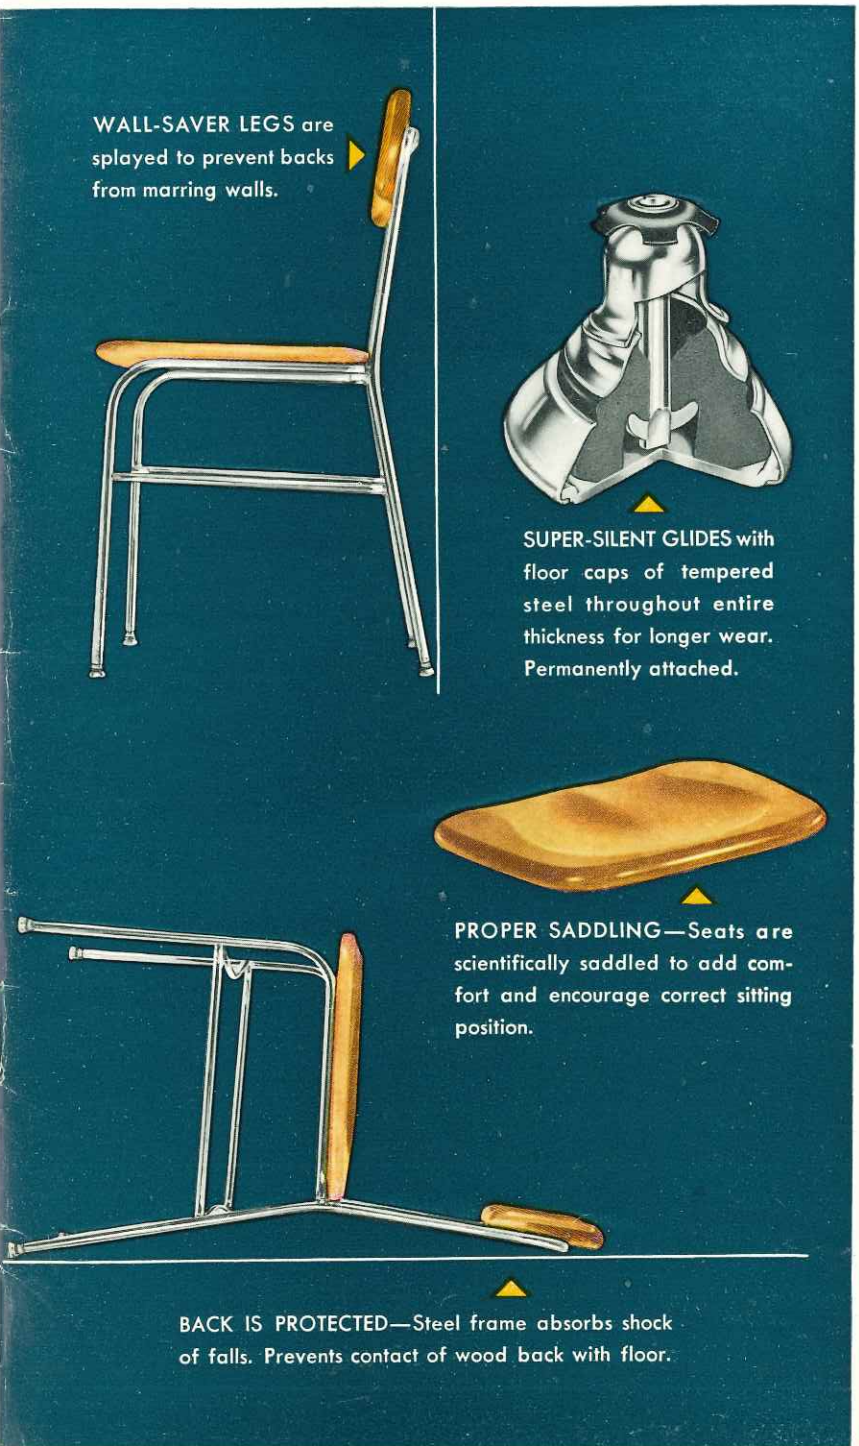
Heavy-duty, 14 gauge, 5/8" tubular steel

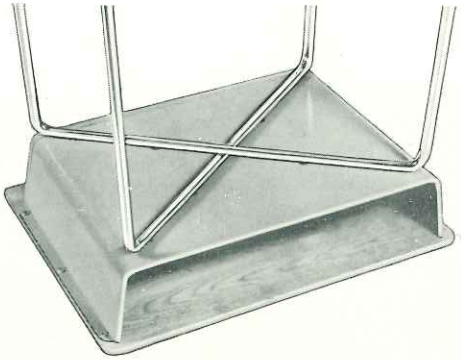


RESISTANCE WELDING AT SIX POINTS by special electrical machinery makes joints (indicated by circles) stronger than the steel itself.

Into the creation of TrimLine have gone generations of Heywood-Wakefield design know-how and manufacturing skill to meet the most exacting demands of the most modern school system. TrimLine is light in weight, easily grouped and regrouped to meet every classroom need. The dimensions of each unit are scientifically determined for correct posture and maximum comfort.

And because of extra quality of materials and processing, TrimLine will keep its attractive newness year after year with a minimum of maintenance. Whether as original equipment for new buildings or as a means of assuring full effectiveness for modernization projects, TrimLine is a sound choice for immediate functional beauty . . . for long-run economy in years to come.





Legs criss-cross under box. Because legs do not extend through box, they afford greater book box capacity.

One-piece leg brace is resistance-welded to all four legs to provide extra strength. Welding is stronger than the steel itself.

S 100 TRIMLINE ALL-PURPOSE CHAIR

★ 5/8" x 14 Gauge, Chrome-Plated, Steel Tubing

★ Choice of Solid Birch or HeyWoodite Solid Plastic Back

★ Choice of Deeply Saddled Birch or HeyWoodite Solid Plastic Seat

★ Continuous Bracing of Legs with 1/2" x 16 Gauge Steel Tubing

★ Legs Splayed Back to Prevent Marring of Walls

★ Super-Silent, Permanently Attached Glides

★ Available with Bookshelf under Seat, S 100 BS

A NEW AND DIFFERENT BASIC MATERIAL WITH

HEYWOOD-WAKEFIELD
EST. 1826

HeyWoodite
SOLID PLASTIC

This exclusive Heywood development is a high density, solid, thermosetting plastic. Under heat and extreme pressures, the chair backs, seats and table tops are molded in one piece in a single operation. HeyWoodite is not a laminate . . . each piece is the same solid, virtually indestructible material through and through. Even the color, unlike ordinary surface coatings, remains the same throughout.

HeyWoodite is formed in highly polished stainless steel molds which produce a permanent surface of exceptional smoothness and uniformity. Edges are smooth and as attractive as the flat surfaces.

For your school, HeyWoodite (patents pending) means furniture with greater durability, greater beauty . . . furniture which will be more functional and which will enforce measurable maintenance and replacement economies for years to come. You cannot expect comparable performance from any other material.

UNIQUE ADVANTAGES FOR SCHOOL FURNITURE

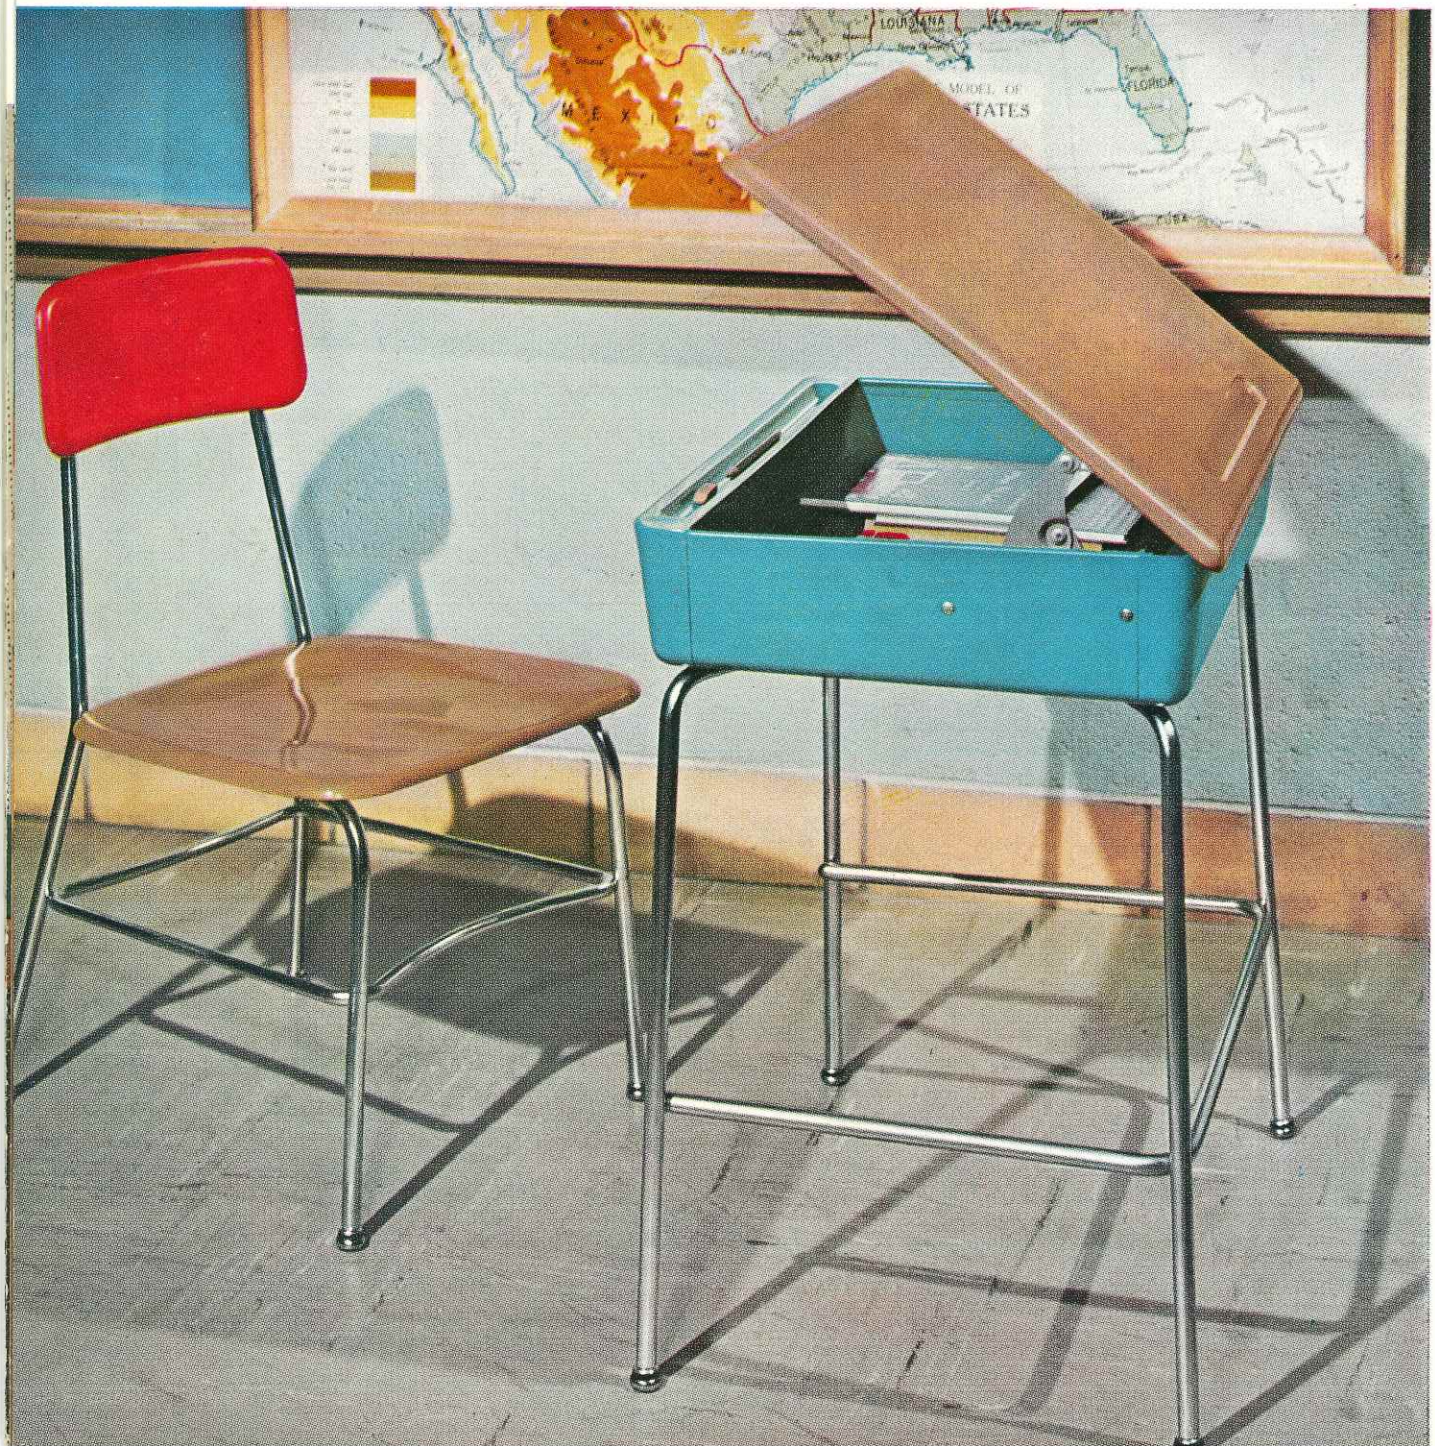
Heywood Wakefield 1/20/58

COLORS OF CHAIR SEATS, BACKS AND DESK TOPS

NATURAL | COCOA | LIGHT GREEN | YELLOW | RED

Trimline Lifting-Lid Table-Desk S 226 LL P (HeyWoodite Solid Plastic) and All Purpose Chair S 100 P (HeyWoodite Solid Plastic)

This one-piece lid has two fully enclosed, adjustable friction hinges which hold the lid in any position and permit silent closing. The Lifting-Lid Table-Desk with 18″ x 24″ top is available in nine graded heights from 20″ to 30″. Chairs are available in eight graded sizes with seat heights from 11″ to 18″.



COLORS OF BOOK BOXES

BLUE GREY | COCOA | LIGHT GREEN | TANGERINE | LIGHT BLUE

Trimline Movable
Study-Top Chair Unit
S 601 STBR P
(HeyWoodite Solid Plastic)

Particularly favored for classrooms from junior high school through college, this unit has an 18″ x 24″ desk-size study surface with separate arm rest. Lighter than the separate desk and chair, this single unit may be moved about easily for group discussions and activities. Available with or without bookrack.

TC 616 "SCHOLASTIC"

An outstanding example of Heywood-Wakefield comfort in auditorium seating, the TC 616, is a budget model of the "Encore," illustrated to the right, with the same comfort seat construction and back padding. Seat coils are permanently fastened to the all-steel seat frame. The two-piece steel back panel gives full length protection to the seat in both raised and sitting positions; the all-steel rolled edge protects top and sides of back upholstery fabric. Available with rubber cushion.

TC 700 "ENCORE"

Thorough-going comfort is assured by the well-padded back and the 16-coil spring seat with spring edge. Seat coils are permanently fastened to the all-steel seat frame. The one-piece, die-formed steel back panel gives full protection to the seat in both the raised and sitting positions; the all-steel rolled edge protects top and sides of back upholstery fabric. Seat equipped with completely enclosed, silent action, self-lifting hinges. Available with rubber cushion.

TC 713 "ASSEMBLY"

Designed and constructed to assure lowest maintenance cost, this model has a steel back panel completely covering the plywood back with rounded edges protecting top and sides. The metal back extends down to protect the rear edge of the seat also. The seat is 5-ply, 7/16" plywood and the back is 5-ply, 1/2" plywood, metal clad.

TC 704 "MEDALIST"

With the exception of its molded plywood back, the "Medalist" duplicates all the comfort and construction features of the highly popular "Encore." The seat is constructed with steel coil springs properly graduated in compression for all-over comfort and supported by a pressed steel bottom pan. The comfortably curved back is available in 5-ply, 7/16" plywood (available with aluminum edging for added protection) and 7-ply, 3/4" securely bonded plywood.

TC 705 "ARISTOCRAT"

(Shown in foreground)

This model has been carefully designed to meet budgets demanding full comfort and lasting durability at a modest outlay. Like all Heywood-Wakefield auditorium chairs, it has all-steel aisle and center standards, steel hinges and back fastenings. The seat is 5-ply, 7/16" plywood and the back is available in either 5-ply, 7/16" or 7-ply, 3/4" plywood.

TC 700 TA TABLET ARM

(Shown in rear)

All Heywood-Wakefield auditorium chairs are available with folding tablet arm. Whenever the auditorium must also serve as a lecture hall, this chair is a sound choice. The tablet arm swings out of the way when not in use to permit easy ingress and egress. All working parts are steel. Comfortably padded back and full coil spring edge seat.

PORTABLE CHAIRS

An outstanding feature of the entire Heywood-Wakefield line of portable chairs is their oval tubular steel frame construction. All joints are welded to make the entire frame a sturdy integral unit which will stand up under continuous service. Proportions and comfort comparable to fixed auditorium chairs.

T 276 (*left*)—16-coil spring edge seat and fully padded back. One piece steel back panel with rounded metal edge.

T 270 (*center*) —Seat and back of 5-ply, 7/16" plywood. Ample splay of legs to assure stability.

T 273 (*right*) — Seat is 10-ply, 3/4" applied panel construction. Back is 8-ply, 3/4" inserted panel construction. Seat and back covered with choice of upholstery fabrics.

HEYWOOD-WAKEFIELD

EST. 1826

PIONEERS IN SCHOOL FURNITURE

For sixty-five years, serving the nation's schools with furniture of *extra quality*

The Heywood-Wakefield plants rank among the largest in the furniture industry. Modern precision machinery and streamlined assembly lines make them the most efficient. In addition to Tubular Steel School Furniture, Heywood-Wakefield produces many products for home and industry: Modern, Old Colony and Ashcraft furniture—tubular steel furniture for household use—railway car seats—bus seats—theatre and auditorium seating—steel tubing and specialty products.
